

Exchange Monitoring

COMPREHENSIVE SUPPORT FOR
MICROSOFT EXCHANGE ONLINE & MORE

Synthetic Monitoring for Microsoft Exchange

Email is the lifeblood of every business great or small. Still maintaining your Exchange installation or moved on to Office 365, you're still on the hook to make sure that everything works correctly. With Office 365, Microsoft can only see what's happening in their datacenters, they can't see end-to-end, your network, or your additional inbound and outbound mail filters and flow. You need to monitor end-to-end.

CloudReady Monitor for Exchange continuously tests ALL of the critical mail accessing technologies with complete support for MAPI, MAPI-over-HTTP, ActiveSync, Outlook Web App and more. CloudReady makes it easy to setup behind the firewall or out in the cloud for comprehensive coverage of your Exchange environment from all vantage points.

- Find and fix upstream and downstream problems fast
- Detect changes in your providers; SMTP, SPAM & MDM
- Optimize network capacity
- Pinpoint outages to make sure you get back online quickly.

Complete Coverage for Exchange

MAPI MAPI-over-HTTP

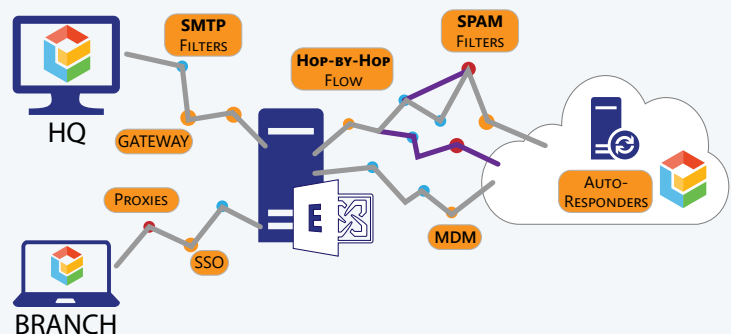

Outlook Web App ActiveSync

EWS IMAP

Monitor MAPI, ActiveSync, OWA, EWS — Continuously Test Network & Mail Flows

End-to-End Exchange Intelligence

- Continuously measure and test end-to-end
- Quickly deploy to any branch office or variable network condition
- Capture before/after when making changes
- Monitor proxies, gateways, Single Sign-On (SSO) and **everything in between**
- Hop-by-hop Network Path Performance gives you the visibility to pinpoint the bottleneck
- Know about problems before Microsoft does

Monitor Exchange from the Inside to the Outside

Monitor Exchange from Public Cloud Locations Everywhere

Enterprise Use Cases

Plan Your Exchange Deployment

Your network, proxy and SSO capacities always change. Test your Exchange and mail providers capacity before and after you roll out changes

Proactively Monitor Exchange End-to-End

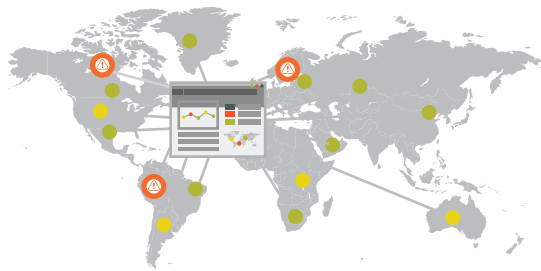

Know about problems before they impact your users. Find out even before Microsoft does and react quickly with deep diagnostics.

Troubleshoot Issues Anywhere

CloudReady is instantly self-service deployed to any branch office or network topology. CloudReady can run alongside any workload, any Windows® device or VM

Benchmark Your Organization

With Crowd Data Analytics™ you can see how your WAN, LAN, MPLS & WiFi compare to others. Find out if the problem is yours, the ISPs, or your providers in real-time

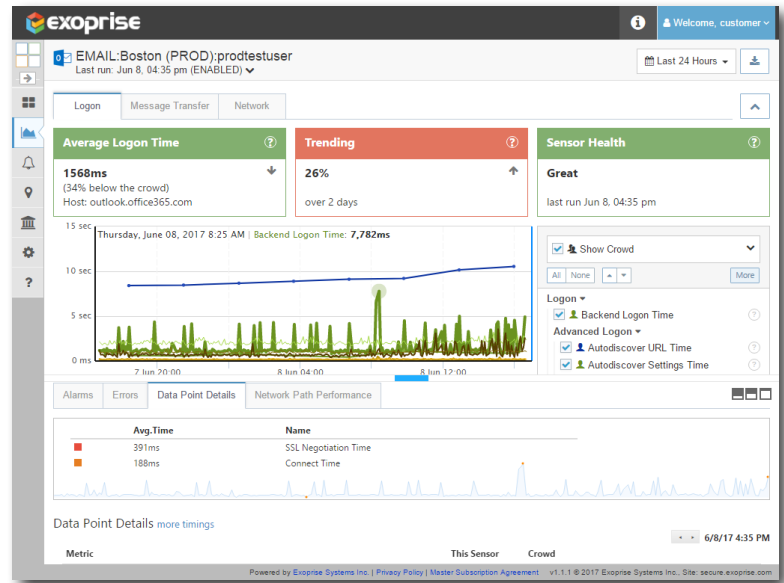

Crowd Data Analytics

Cloud services like Office 365 are delivered globally to millions of users. CloudReady harnesses the power of the crowd by enabling you to benchmark your performance metrics against crowd averages to quickly determine if issues are local, in the network, or in the cloud.

- Benchmark performance with other Office 365 customers around the globe.
- Quickly isolate the location of any service disruption; local LAN/WAN, ISPs, SSO or other providers.
- Speed time to resolution; avoid unnecessary support calls.

High-level Actions, Low-level Metrics

From autodiscover to continuous login, SSO and email flow tests, CloudReady E-Mail sensors give you real-time alarms, low-level diagnostics and long-term availability trending
